Product Features

High speed & low latency

Predator Vesta II RGB module is built with high-quality, hand-screened DDR5 ICs to deliver next-level speeds up to 7200 MHz, unleashing new potential for enthusiasts.

Newest DDR platform

By doubling the banks and the burst length-- and by featuring two independent 32-bit subchannels-- DDR5 enables faster rendering, processing, buffering than ever to satisfy the growing demands.

Stylish metallic heat sink

Predator DDR5 Vesta II offers a metallic heat sink made of aluminum alloy for enhanced heat dissipation and stable performance. Provides silver and black versions, Predator Vesta II gives you the chance to create your own style.

Supports XMP 3.0 for the latest generation of overclocking

XMP 3.0 enables three factory pre-set profiles, provides users with more options for overclocking, and allows two customizable user-defined profiles to be saved in the memory module via BIOS on supported motherboards. Your fine-tuned-memory settings can go wherever your Vesta modules go.

Programmable RGB lighting

Designed with a more streamlined light bar, the Predator Vesta II RGB looks sleeker and brighter than ever. It is compatible with mainstream motherboard software from ASUS, Gigabyte, ASRock and MSI. Our customizable RGB lighting lets you choose from a palette of 16.8 million colors.

Built with trustworthy quality

On top of using high-quality components for Vesta II, the units undergo a barrage of strict testing throughout the production process-- tests for compatibility, reliability, and other parameters of quality and endurance.
